### Suggested Applications
- Fine art and photographic open and limited edition prints
- Fine art and photographic reproduction and restoration
- Portfolios
- Albums
- Cards and postcards

### Paper Handling
- Fine Art papers are fragile and need to be handled with care. Try not to touch the surface of the paper.
- Glossy papers will mark more easily with grease from your fingertips.
- Leave papers open to the air to fully dry for a few hours after printing, (24 hours are recommended) and avoid stacking on top of each other straight away.
- A giclée varnish or spray will help protect your print further from damage, effects of UV light and environmental attack.

### Storage and Conditions of Use
- The storage of all papers should take place in a recommended climate of 15-25°C, relative humidity of 40 - 60% and out of direct sunlight.
- Do not exceed temperatures of 82°C (180°F) when dry mounting.
- Return unused paper to the original box and store flat. If storing the paper outside the original box, only use archival packaging.

### Technical Information
- Thickness: 440μm
- Weight (gsm): 300gsm
- Coating Type: Unglazed gloss
- OBA: Yes
- Whiteness (CIE): 104
- Brightness (TAPPI): -
- pH: 8.2
- Opacity: 99
- Recyclable: Yes
