

PhotoSatin Premium RC 270 gsm

Canson® Infinity PhotoSatin Premium Resin Coated consists of an alpha cellulose acid-free art paper coated with a structured polyethylene and a microporous receiver layer. This exceptional photographic paper has been designed to comply with the highest lifespan requirements. The surface aesthetic of **PhotoSatin Premium RC** is reminiscent of the original photochemical papers traditionally associated with the Baryta market.

This paper gives softened reflections on photographs. It is a great choice for black & white and colour photography.

Specifications:

Testimony:

Robert Rodriguez

« I love a stain look for many of my landscape images, and PhotoSatin provides a wonderful smooth finish with just the right amount of contrast and sheen without becoming a distraction to the subtleties of the image. »
